## **Jessica Hess Artist Statement**

Rather than elegance or grandeur, my focus lies in structure, simplicity, and decay. In practice I work with photographs, which serve as both a reference and a starting point. My work develops from an accumulation of images and impressions of urban, industrial, and abandoned architecture.

All street art evidences creative traffic and the time invested by others on my otherwise lonely subjects, adding color and excitement to otherwise dull locations. In reworking and transforming these locations my paintings further this collaboration of time, structure, and surface.
